Greater Noida, Uttar Pradesh, India - 201310

SUMMARY

Backend-focused Java developer currently pursuing Master of Computer Applications with hands-on experience in building scalable and secure web applications using Java, Spring Boot, Spring Data JPA, and MySQL. Strong expertise in designing RESTful APIs, implementing authentication and authorization using JWT and OAuth 2.0, and developing clean, maintainable layered architectures. Experienced in API documentation using Swagger and proficient with tools like Git and Postman for efficient development and testing of reliable backend systems.

TECHNICAL SKILLS

- Backend Development:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate ORM, RESTful API Design, Layered Architecture
- Security:** Spring Security, JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC), Security Filter Chain
- Databases:** MySQL (Schema Design, CRUD Operations, Joins, Transactions, Query Optimization)
- Programming Languages:** Java (Primary), JavaScript, SQL, HTML, CSS
- API & Tools:** Swagger / OpenAPI 3.0, Postman, Bean Validation, Global Exception Handling
- DevOps & Tools:** Git, GitHub, Docker, Maven, Redis, Render, STS, IntelliJ IDEA, Eclipse
- Core Concepts:** OOP, Collections Framework, Multithreading, Exception Handling, MVC Architecture, Pagination & Sorting, CI/CD Basics

PROJECTS

E-Commerce REST API

Spring Boot | Data JPA

Backend service for an e-commerce platform supporting user authentication, product management, and order processing.

- Implemented secure JWT-based authentication with role-based authorization (ADMIN, CUSTOMER) to protect APIs.
- Developed complete product management system including image upload to server storage and retrieval via REST endpoints.
- Designed order management system with proper entity relationships (User → Order → OrderItems → Product) to handle multi-product orders.
- Implemented pagination, sorting, and searching for efficient product listing and optimized data retrieval.
- Added global exception handling and request validation to ensure robust and user-friendly API responses.
- Followed layered architecture (Controller, Service, Repository) for clean, scalable, and maintainable backend design.
- Tested all APIs using Postman, managed version control using Git, and containerized the application using Docker.
- GitHub: github.com/rishabh-singh2005/ECommerceRESTapi

Online Bookstore Web Application

Servlets | JSP | MySQL

Web-based bookstore for browsing books, user authentication, and order management.

- Developed a dynamic bookstore web application using JSP, Servlets, and MySQL enabling users to browse books and manage orders.
- Implemented user authentication, session management, and book ordering functionality.
- Followed layered architecture and integrated MySQL database using JDBC for persistent data storage.
- GitHub: github.com/rishabh-singh2005/Bookstore

EDUCATION

Master of Computer Applications (MCA)

Noida Institute of Engineering & Technology

Graduating 2026

Greater Noida, India

Bachelor of Science (B.Sc.)

Snatkottar Mahavidyalaya

Graduated 2024

Pratapgarh, India

CERTIFICATIONS

Java SE — Core Java Concepts Certificate

SQL for Data & Applications — MySQL Certificate

Spring Boot & RESTful API — Spring Boot Certificate

Infosys Springboard, 2024

Infosys Springboard, 2024
